

Shahd Usama Kassem Awad

Alexandria, Egypt | 01006360685 | shahdusama2030@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Computer & Communications Engineering student with a strong foundation in networking, technical troubleshooting, and programming. Passionate about solving technical problems and delivering excellent customer support through analytical thinking and effective communication.

EDUCATION

Bachelor of Engineering in Computer & Communications Engineering

Alexandria National University | Sep 2024 - Expected Jun 2029

Alexandria, Egypt | CGPA: 3.93 / 4.00

TECHNICAL SKILLS

- **Networking:** Networking Fundamentals, IP Addressing & Subnetting, TCP/IP Fundamentals, VLANs, Routing & Switching, Network Troubleshooting, Network Security Fundamentals, Cisco Packet Tracer
- **Data Analytics & Visualization:** Excel, Python (Pandas, NumPy), SQL, Power BI, Tableau
- **Programming:** C, C++, Python, Data Structures & Algorithms, Arduino
- **IT Support & Customer Service:** Technical Troubleshooting, Customer Communication, Documentation & Reporting, Client-Focused Problem-Solving

TRAINING & EXPERIENCE

Engovation - Cisco CCNA Training | Jul 2026 - Present

- Currently covering networking fundamentals, TCP/IP, Ethernet LANs, VLANs, IPv4/IPv6, Routing & Switching, OSPF, ACLs, Network Security, WAN technologies, and Network Automation
- Performing hands-on labs using Cisco Packet Tracer to strengthen network configuration and troubleshooting skills

Digital Egypt Pioneers Initiative (DEPI) - Data Engineering Track | Jul 2026 - Present

- Learning Data Engineering fundamentals including Python, SQL, ETL, Data Warehousing, Big Data, and Cloud Data Solutions
- Gaining hands-on experience with Azure, Spark, Airflow, Kafka, Docker, and MongoDB while building data pipelines

Cisco & eLearning Competence Center - Network Training | Jul 2026

- Completed training in Network Support & Security, as well as Network Addressing and Basic Troubleshooting
- Enhanced networking fundamentals and technical communication skills through English for IT

Alexandria Electricity Distribution Company - IT Training | Jul 2026

- Completed IT training in cybersecurity fundamentals, information security, and database design and management
- Gained hands-on experience using SQL for database creation, querying, and data manipulation

Digital Egypt Pioneers Initiative (DEPI) - Data Analysis Track | Jun 2025 - Dec 2025

- Recognized as one of the top-performing students in Alexandria Governorate
- Developed interactive dashboards and data visualizations using Python, SQL, and BI tools
- Extracted actionable insights from real-world datasets to support reporting and data-driven decision-making
- Completed 3 freelance data analysis projects for real clients, delivering dashboards and insights under deadlines

CIB Summer Training | Sep 2025

- Gained exposure to financial data analysis, AI applications, and sustainable development
- Learned how organizations leverage data to support business operations and decision-making

PROJECTS

Tourism Data Analysis Project

- Recognized as a top-performing project among participating teams
- Built interactive dashboards to analyze tourism trends and provide insights for different stakeholders
- Cleaned, transformed, and analyzed datasets using Python (Pandas, NumPy), SQL, and Excel
- Developed Power BI and Tableau visualizations to support reporting and data-driven decision-making

Multi-Server Bank Queue Simulation

- Built a Python-based simulation model to analyze customer flow and optimize banking service operations
- Calculated key performance metrics including waiting time, server utilization, and customer drop rate
- Performed optimization and sensitivity analysis to evaluate efficiency improvements and support decisions

Student Management System

- Developed a Student Management System using C and AVL Trees for efficient data storage and retrieval
- Implemented features for insertion, search, update, deletion, and GPA-based analytics

SUMO Robot Project (IRC Competition)

- Served as lead programmer for an autonomous SUMO robot in the International Robotics Competition
- Developed and implemented control algorithms using C++ to improve real-time decision-making

COURSES

- Cisco CCNA (In Progress)

- Data Science & Analytics - HP LIFE
- SAS - AI & Data Literacy
- IBM SkillsBuild - AI & Digital Skills
- AWS AI Practitioner - Udacity
- Google Build with AI - ITI / Google
- AI Prompting for Impact - Dubai Future Foundation

ACTIVITIES & LEADERSHIP

- Teaching and Community Support Volunteer - Talaei Development Association
- Vice Head of Media Team - Alexandria Students Surgical International Association
- International Robotics Competition (IRC 2025): Participated in SUMO robot development
- Microsoft Ideation Camp 2023: Participated in an innovation and entrepreneurship workshop
- AWS Educate 2023: Gained exposure to cloud computing and AWS fundamentals
